

## Application Memo

### Salinity of Egg Yolk

|                    |                                   |
|--------------------|-----------------------------------|
| Industry           | Food & beverage                   |
| Instrument         | Automatic potentiometric titrator |
| Measurement method | Precipitation titration           |
| Standards          | GB/T 12457                        |

Generally, sodium chloride is measured according to Mohr method.  
After stirring the egg yolk, dilute it with pure water and stir again. The sample is titrated by an automatic Mohr
